LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
BUREAU OF STATISTICS,
Washington, D. C., June 30, 1909.

SIR: I have the honor to transmit herewith a compilation of statistics of the imports of farm and forest products for the year ending June 30, 1908, with those for two previous years given for comparison. The data have been derived from the Bureau of Statistics of the Department of Commerce and Labor, and the work of compiling has been performed by the Division of Production and Distribution.

This report is a continuation of a series of bulletins on the same subject designed for the use of this Department and to meet the demands of a large number of correspondents. They contain an arrangement of the statistics and a determination of totals, with various comparisons, not presented in any other publication.

It is respectfully recommended that this report be published as Bulletin 76 of this Bureau.

Very respectfully,

VICTOR H. OLMSTED,
Chief of Bureau.

HON. JAMES WILSON,
Secretary of Agriculture.

EXPLANATION OF TERMS.

IMPORTS.—Goods from a foreign country entered at a custom-house.

IMPORTS FOR CONSUMPTION.—The term “entry for consumption” is the technical name of the import entry made at the custom-house, and does not imply that the goods will be actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

FOREIGN EXPORTS OR REEXPORTS.—Goods which have been imported into this country, either for reexport or for consumption, and are afterwards exported, having undergone no change in form or condition or enhancement in value by the application of labor in the United States.

DOMESTIC EXPORTS.—Goods produced or manufactured in this country from either domestic or imported raw materials, and which are shipped to foreign countries.

TRANSIT OR IN-TRANSIT TRADE.—Goods from a foreign country passing through the United States on the way to the same or another foreign country.

TRANSSHIPMENT TRADE.—Goods from a foreign country received at a United States port and there reshipped to a foreign country without being entered as an import into this country.

In-transit and transshipment trade is not included in the imports and exports of the United States, but is reported separately.

THE COUNTRY OF CONSIGNMENT is that which is mentioned in the exporting or importing documents as the one from which or to which the merchandise is to be shipped. The regulations of the Bureau of Statistics, Department of Commerce and Labor, are:

Collectors will consider the country in which merchandise was invoiced as the country whence the same was imported into the United States.

In export statements the countries stated should be, so far as can be ascertained, those for which the exports are destined for a market. * * * Exporters will be required to state in their manifests of goods exported the country of ultimate destination.

The country from which or to which goods are consigned may or may not be the country of origin or ultimate destination, as the case may be; the foregoing regulation with regard to the country of ultimate destination in export statements does not result in a material representation of countries of ultimate destination in place of countries of consignment in the records of the exports of this country, when these two countries are not the same.

VALUES.—The values of imported articles subject to *ad valorem* duties are defined by the Act of Congress of June 10, 1890, as—

The actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

The value of all other imports, whether subject to specific duty or free of duty, is also determined according to the law just quoted.

The value of domestic exports is their declared value at the time of exportation in the ports of the United States whence they are exported, which the law requires to be stated under oath, with penalty for misstatement.

The value of foreign exports when shipped directly from bonded warehouses (usually dutiable goods) is their import value, but when not shipped from bonded warehouses (usually free goods) the value is determined in the same manner as that of domestic exports.

Goods in transit through the United States from one foreign country to another are valued in the same manner as imports.

Valuation deceptions.—The value of imported articles subject to *ad valorem* duties is believed to be determined with more accuracy, according to the legal method of valuation, than the value of imports with specific duties or free of duty, or the value of exported articles; the valuations of dutiable imports and of exports dutiable in foreign countries tend to understatement; and the valuations of imports that are free of duty are liable to inflation for the purpose of trade deception.

WEIGHTS.—In the official trade returns of the United States the weights of articles exported are usually net weights, and also the weights of all imports, except those which are subject to a specific duty levied upon the weight of the packages, including the weight of the article itself, together with some or all of its coverings.

All tons mentioned in this bulletin, except where it is otherwise stated, are long tons of 2,240 pounds.

DISCREPANCIES IN FOREIGN TRADE STATISTICS of various countries are partly due to different methods of estimating values, of determining countries of origin and destination, and of classifying merchandise, and to differences in dates. The United States does not regard a c. i. f. value (cost, insurance, freight) as the value of either exports or imports (except some foreign exports), while the United Kingdom, for instance, includes these in the value of its imports. It is said that these charges are often erroneously included by British shippers in their statement of export values, especially when the selling price includes insurance and freight.

The United States trade returns include in Germany the free ports of Hamburg, Bremen, and Lübeck, while the statistics of the German Empire did not prior to March 1, 1906.

In consequence of various sources of discrepancy, it is generally futile to undertake to balance an export of this country by any official statement of import into a foreign country, and often there is not an approximate agreement.

NONCONTIGUOUS POSSESSIONS.—The noncontiguous possessions of the United States are all those not included between Canada on the north and Mexico and the Gulf of Mexico on the south, and between the Atlantic and Pacific oceans.

The trade returns of all the possessions of this country, except the Philippine Islands, are included in the total trade of the United States. In the trade statistics for any noncontiguous possession, all other noncontiguous possessions, except the Philippine Islands, are included with the United States; thus, shipments from Hawaii to Porto Rico are included in the total shipments from Hawaii to the United States.

IMPORTS OF FARM AND FOREST PRODUCTS, 1906-1908.

GENERAL SURVEY.

The farm products imported into the United States during the fiscal year 1908 were valued at \$540,000,000, which was \$14,000,000 less than in 1906 and \$87,000,000 less than in 1907. The value of imports not classed as agricultural also showed a decrease in 1908 from the two preceding years, and the net result is that agricultural products formed 45.2 per cent of the total in 1908 as compared with 43.7 per cent in 1907 and 45.2 per cent in 1906. On the basis of value, more than one-half of the total imports during seven of the ten years prior to 1900 consisted of agricultural products, but for each of the nine years beginning with 1900 imports of this class of articles were less than one-half of the total. The total value of imports of farm products has increased more than eightfold since 1851.

The forest products imported in 1907 were more than three times as much in value as in 1894 and more than twice as much as in 1902; but in 1908 a decrease of \$24,000,000 is shown, \$22,000,000 of which was due to india rubber, the same article that represented more than 50 per cent of the enormous increase in 1907. (See Table 2.)

The relative importance of the grand divisions in regard to the value of farm and forest products imported from them was the same in 1908 as in 1906, and with one exception, as in 1907. North America, which ranked first as a source of forest products in 1906 and 1908, fell below South America in 1907.

Of the farm products, \$177,000,000 in 1908 came from Europe, \$140,000,000 from North America, \$112,000,000 from Asia, and \$111,000,000 from the other three grand divisions. As shown in Table 3, the largest percentage of gain from 1906 to 1908 was in imports from Africa; farm products from this grand division amounted to \$12,000,000 in 1906 and \$15,000,000 in 1908. Imports of forest products from South America show the greatest change; an increase of \$11,000,000, of which \$9,000,000 was india rubber, occurred in 1907, while a decrease of \$15,000,000 followed in 1908, due to a decline in the quantity of that article imported, and also to its reduc-

tion in import price from an average of 77 cents per pound in 1907 to 59 cents in 1908.

In each of the three years mentioned in Table 4, farm products imported from Cuba exceeded in value those from any other country, but were \$14,000,000 less in 1908 than in 1907, owing to a decrease in the imports of cane sugar of approximately the same amount. Other large decreases were as follows: Brazil, \$10,000,000; British India, \$9,000,000; United Kingdom, \$8,000,000. A gain of \$3,000,000 each was made by imports of this class of articles from Japan and the Dutch East Indies, and of fully \$1,000,000 each from Spain and Santo Domingo.

The value of forest products imported from the two chief sources, Canada and Brazil, in 1908 was \$50,000,000 and the total from all countries was \$98,000,000. The greatest increase in value of imports of forest products for 1907 from any one country was \$9,000,000 in the case of Brazil, and the same country also showed the greatest decrease in 1908 (\$14,000,000), variations in the shipments of india rubber being responsible for these violent fluctuations. Imports from the United Kingdom showed a decrease of more than \$4,000,000 attributable chiefly to the same product. Other important decreases, exceeding \$1,000,000 each, were seen in imports from Belgium, British India, and Portugal. The largest increase (\$2,000,000) in imports of articles of this class was shown in those from Canada. (See Table 5.)

The aggregate value of the 5 principal items of farm products imported in 1908 was \$330,000,000; the same items amounted to \$402,000,000 in 1907 and \$360,000,000 in 1906. These leading items in 1908 and their values were: Sugar and molasses, \$81,000,000; coffee, \$68,000,000; packing-house products, \$66,000,000; silk, \$65,000,000; and vegetable fibers, chiefly cotton, sisal, manila, and jute, \$50,000,000. The total imports of farm products in 1908 was \$540,000,000, as compared with \$627,000,000 in 1907, a decrease of \$87,000,000, of which \$72,000,000 was caused by a decline in imports of the items above mentioned. (See Table 6.)

The value of farm products received by the United States from its island possessions and Alaska in 1908 was \$73,000,000, an increase over the preceding year of \$16,000,000, of which \$12,000,000 was due to sugar from Hawaii and \$4,000,000 to sugar from Porto Rico. The decrease of nearly \$1,500,000 in the imports from the Philippine Islands was confined mostly to manila fiber. (See Tables 7-12.)

Shipments of forest products to the United States from these possessions have been of slight importance; their value was \$3,000 in 1906, \$20,000 in 1907, and \$47,000 in 1908.

TABLE 1.—*Value of imports of FARM products into the United States, 1851-1908, and comparison with total imports.*

[All values are gold.]

Year ending June 30—	Total.	Farm prod- ucts. ^a	Other than farm prod- ucts.	Per cent of farm products of total.

1903.....	1, 025, 719, 237	456, 199, 325	569, 519, 912	44. 5
1904.....	991, 087, 371	461, 434, 851	529, 652, 520	46. 6
1905.....	1, 117, 613, 071	553, 851, 214	563, 661, 857	49. 6

^a The classification employed from 1890 to 1901 differs from the present classification by including prepared opium and (in 1896-1901) gelatine, but not cochineal, licorice root, nor (in 1891-1893) beer extract. The value of the products included in this table for 1890-1901, but not subsequently, was as follows: Prepared opium, 1890, \$269,586; 1891, \$567,035; 1892, \$547,528; 1893, \$446,422; 1894, \$310,771; 1895, \$920,006; 1896, \$735,134; 1897, \$1,132,861; 1898, \$652,341; 1899, \$828,203; 1900, \$1,065,965; 1901, \$972,582; gelatine, 1896, \$15,386; 1897, \$5,748; 1898, \$25,907; 1899, \$21,961; 1900, \$30,361; 1901, \$23,230. The value of the products now included, but not in 1890-1901, was as follows: Cochineal, 1890, \$42,435; 1891, \$19,779; 1892, \$55,883; 1893, \$52,572; 1894, \$28,124; 1895, \$38,568; 1896, \$50,988; 1897, \$41,943; 1898, \$45,762; 1899, \$23,207; 1900, \$31,211; 1901, \$20,414; licorice root, 1890, \$794,503; 1891, \$896,597; 1892, \$1,601,028; 1893, \$1,688,716; 1894, \$1,209,728; 1895, \$1,404,563; 1896, \$1,401,748; 1897, \$1,022,650; 1898, \$1,171,621; 1899, \$1,566,830; 1900, \$1,667,456; 1901, \$1,737,097; beer extract, 1891, \$6,470; 1892, \$5,411; 1893, \$2,291.

TABLE 1.—*Value of imports of FARM products into the United States, 1851-1908, and comparison with total imports—Continued.*

[All values are gold.]

Year ending June 30—	Total.	Farm products.	Other than farm products.	Per cent of farm products of total.
